PROFESSIONAL SUMMARY

Flutter Mobile App Developer with a BSc in Computer Science and a software engineering background in JavaScript, Node.js, and REST API development. Currently building three cross-platform mobile applications for Android and iOS at Integrated Software Service Limited, using Flutter, Dart, Provider, Riverpod, and Firebase. Experienced in state management, secure local data storage, user authentication, and unit and widget testing. Focused on clean, maintainable code and smooth user experiences. Project details, demos, and code samples available upon request.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Widgets, Responsive UI, Navigation, Animations

State Management: Provider, Riverpod

Backend and APIs: REST API Integration, Firebase Authentication, Node.js, Express.js

Local Storage: SharedPreferences, Flutter Secure Storage, Hive

Testing and Debugging: Flutter Unit Testing, Flutter Widget Testing, Postman API Testing, Debugging

Languages: Dart, JavaScript, HTML5, CSS3

Tools and DevOps: Git, GitHub, CI/CD Pipelines, Linux, AWS, Azure

PROFESSIONAL EXPERIENCE

Flutter Mobile App Developer | Integrated Software Service Limited (ISSL) **May 2026 – Present**

- Develop three cross-platform mobile applications with Flutter and Dart, including a savings (ajo) app and an educational payment app.
- Manage application state with Provider and Riverpod to keep code organized and scalable.
- Implement user authentication with Firebase Authentication.
- Store data locally with SharedPreferences and Hive, and protect sensitive data with Flutter Secure Storage.
- Write unit and widget tests to improve app reliability.

IT Trainee and Tutor | Joshmit Technology **Sep 2024 – Feb 2025**

- Gained hands-on experience with web technologies through practical, project-based training.
- Moved into a tutoring role, teaching students frontend development fundamentals.
- Built a Data Privacy Guard browser extension as part of practical training.

PROJECTS

Savings (Ajo) Mobile Application | Flutter, Dart | Company Project (Confidential)

- Developing a cross-platform mobile app for digital savings (ajo) on Android and iOS.
- Project details and demo available upon request.

Educational Payment Mobile Application | Flutter, Dart | Company Project (Confidential)

- Developing a cross-platform mobile app for educational payments on Android and iOS.
- Project details and demo available upon request.

Real-Time Web Tracker Detection and Blocking Extension | Final Year Project, 2025

- Designed and built a browser extension that detects and blocks third-party trackers in real time to protect user privacy.
- Applied data privacy principles and event-driven JavaScript logic.

To-Do Application | JavaScript | **todo-list-eta-three-51.vercel.app**

- Built a task manager with search, All/Completed/Pending filters, a task counter, and validation for empty inputs.
- Implemented local storage so tasks persist between sessions.
- Deployed the app and managed the code on GitHub.

DW Legal Practitioners Website | **dw-legal-practitioners.onrender.com**

- Developed and deployed a website for a law firm.

EDUCATION

Bachelor of Science in Computer Science | Kwara State University **Aug 2021 – Aug 2025**

- Coursework in programming, algorithms, and computer systems.
- Projects in web development and data privacy.

CERTIFICATIONS

Linux – Level 1 (Topic Completion Certificate) | KodeKloud **Dec 2025**
